Career Objective

Motivated and detail-oriented Computer Science (AI & ML) graduate in a challenging role where I can apply my skills in full-stack web development, machine learning, and AI-powered application development. Eager to contribute to innovative projects, deliver impactful solutions, and grow as a professional in a dynamic technology-driven environment.

Education

Anil Neerukonda Institute of Technology and Sciences (ANITS)	Visakhapatnam
B.Tech – CSE (AI & ML)	CGPA: 8.55/10 2022 – 2026
Tirumala Junior College	Visakhapatnam
XII Class (MPC)	Percentage: 93.5/100 2020 – 2022

Work Experience

Full Stack Web Development Intern – Edumoon, Hyderabad	May 2024 – Jun 2024
- Designed and deployed a full-stack Restaurant Web Application with pre-ordering, secure payment processing, and order management. - Engineered a responsive front-end using HTML, CSS, and React.js, improving UI navigation and user experience for 100+ concurrent users.	

Projects

Smart Sight — AI-Powered Assistive Application for the Visually Impaired	2026
- Designed an AI-based application supporting blind individuals with real-time obstacle detection and navigation guidance. - Implemented computer vision algorithms for object detection and integrated audio alerts guiding users left or right.	
AI Flashcard Generator — Python, Generative AI, NLP	2025
- Built an AI-powered flashcard system using generative models to produce topic summaries, key concepts, and timed study cards. - Enabled configurable time-limit and topic-depth settings, improving study efficiency for targeted exam preparation.	
Hotel Management System — React.js, Node.js, MongoDB, Express.js	2025
- Engineered a full-stack hotel booking platform with room reservations, billing, invoice generation, and customer history tracking. - Integrated secure payment processing and transaction records, streamlining end-to-end hotel operations.	
Hospital Management System — Python, SQL, Full-Stack	2024
- Built a web application to digitize hospital operations managing patient records, doctor databases, and appointment scheduling for 3+ departments. - Implemented role-based access control and data integrity checks, reducing manual record-keeping effort by an estimated 60%.	
Online Sales Prediction — Python, Scikit-learn, Pandas, NumPy, Matplotlib	2024
Developed regression and classification ML models to predict online sales trends, achieving measurable accuracy improvements through iterative feature engineering.	

Technical Skills

Languages & Libraries: Python, JavaScript, SQL, Pandas, NumPy, Scikit-learn, Matplotlib
Web Development: React.js, Node.js, Express.js, MongoDB, HTML, CSS
Machine Learning: Supervised Learning, Unsupervised Learning, Regression, Classification, Model Evaluation
Cloud & DevOps: AWS (EC2, S3, Elastic Beanstalk), Git, GitHub, Web Application Hosting
Soft Skills: Problem Solving, Team Collaboration, Time Management, Adaptability

Achievements

NPTEL – Internet of Things: Completed certified course	April 2025
NPTEL – Java Programming: Completed certified course, National Programme on Technology Enhanced Learning	2024
AWS Cloud & Web Development Workshop: Hands-on practical deployment experience	2024
